

---

izR Solutions Limited's Internet Roaming service provides secure and cost-effective global access to the Internet, email and corporate network applications, via iPassConnect™ in conjunction with Sprint. This software is easy to use, enabling users to access the Internet and corporate network via local lines, toll-free numbers, wired broadband and Wi-Fi hotspots around the world.

---

### SMTP Authentication

SMTP authentication lets you use our mail servers for sending email while you are roaming with the iPass system.

Most modern email programs support SMTP authentication, but older versions may need to be upgraded first.

To enable SMTP authentication, you need to take the following steps.

#### Outlook Express

1. Choose **Tools -> Accounts**.
2. Click on the **Mail** tab, highlight the mail account you are using and click **Properties**.
3. Click the **Servers** tab.
4. Change the **Outgoing mail (SMTP)** entry in the Server Information section to **smtp.izrsolutions.com**
5. Tick the **My server requires authentication** box in the Outgoing Mail section
6. Click the **Settings** button
7. Click on **Logon using** and enter your username (roam\*\*\*\*\*) and password into the **Account Name and Password** box
8. Click OK

#### Outlook

1. Choose **Tools -> Email Accounts**.
  2. Tick the button next to **View or change existing email accounts** and click Next.
  3. Highlight the mail account you are using and click **Change**, then **More Settings**.
  4. Click the **Outgoing Server** tab at the top of the new window and then tick **Use SMTP authentication**.
  5. Click the **Settings** button
  6. Click on **Logon using** and enter your username (roam\*\*\*\*\*) and password into the **Account Name and Password** box
  7. Click OK
